

CV Services is a diversified trade services group dedicated to delivering the edge in trade services and visual solutions. The CV Services Group of companies provides a broad range of complementary offerings across our four businesses: Electrical Construction, Infrastructure Services, Asset Services, and Media & Signage. Our Vision is “to create a legacy we can be proud of by working with exceptional people”. We will achieve this through our mission of “delivering the edge - with great people, great customers and great systems”.

CV Services recognises its responsibility to protect the environment and to ensure that we have effective procedures and processes in place to minimise the impact of our activity on the environment.

We will ensure compliance with governing legislation in all Australian States and Territories and countries of operation. Our environmental programs will comply with ISO 14001:2015. This commitment applies to all of our business activities, including our team members, contractors and stakeholders.

CV Services will meet its environmental responsibilities through:

- Establishing clear environmental objectives and KPIs, and put in place reporting systems to enable us to effectively monitor our performance against these objectives and KPIs;
- Cooperating with the relevant authorities, clients, suppliers and contractors to achieve compliant environmental practice in the marine and land environment;
- Committing to meet our obligations under national and domestic law for the protection of oceans and waterways;
- Ensuring that all of our services are provided at the highest standards to avoid pollution, conserve materials and energy, manage waste effectively and minimise any environmental impact; and
- Requiring our team members to be conscious of the environmental impact of our operations and put in place training programs to ensure that they have the necessary skills to discharge their environmental responsibilities.

We will always seek to improve our environmental performance and are committed to continually improving our environmental performance including energy usage minimisation and pollution prevention.

Compliance will be rigorously driven through clearly established environmental incident reporting and investigation procedures, timely and accurate reporting, and regular environmental audits.

CV Services believes that all levels of management and all team members are responsible for effective environmental practices and ensuring that, at all times, our activities do not harm the environment.

Andrew McMaster
Managing Director
